BirthdayGen Legal Deployment Instructions

BirthdayGen Legal Integration & Deployment Guide

File Structure

- Place all `.md` policy files into: `/content/legal/`

Components

- Use LegalDocument.tsx from `LegalUI_Tailwind_ReactBundle.tsx`

- Render with `react-markdown` + `remark-gfm`

Routes

- Next.js route `/legal/[slug].tsx` dynamically loads markdown files by name

- Each file title auto-generates page headers

Footer Links

- Link all six legal docs in your global footer

- Include link to Legal Index

Consent

- Add checkbox for Terms/Privacy/Disclaimer at onboarding

- Attach AI content consent checkbox to card/gift tools

- Require confirmation before importing contacts

Supabase Consent Logging

- Store legal version + timestamp in `legal_consents` table

Page-Level UX Integration

- Card Composer: Show Disclaimer

- Gift Checkout: Show Terms + Affiliate Disclosure

- Contact Import: Show Privacy/Terms inline

- Public Wall or RSVP: Require Community Guidelines consent

Legal Routes

- /legal/privacy

- /legal/terms

- /legal/disclaimer

- /legal/cookies

- /legal/affiliate

- /legal/community

- /legal/index

EDM Shuffle Legal Deployment Instructions

EDM Shuffle Legal Integration & Deployment Guide

File Structure

- `/content/legal/` with markdown for each doc

Components

- Use Tailwind markdown component with React Markdown

Dynamic Routing

- `/legal/[slug].tsx` matches filename to document slug

Legal Routes

- /legal/privacy

- /legal/terms

- /legal/disclaimer

- /legal/cookies

- /legal/affiliate

- /legal/community

- /legal/index

UX Integration Points

- Upload Modals: Disclaimer + Community Guidelines

- Festival RSVP Pages: Terms + Affiliate Disclosure

- Cookie Banner with toggles (Essential, Functional, Analytics, Affiliate)

Consent Logging

- `legal_consents` table in Supabase

Footer

- Static links to all six legal docs

Mystic Arcana Legal Deployment Instructions

Mystic Arcana Legal Integration & Deployment Guide

Markdown File Structure

- Stored under `/content/legal/`

Component Renderer

- React component uses Tailwind CSS

- Integrates `react-markdown` and `remark-gfm`

Route System

- Slug-based routing via `/legal/[slug].tsx`

Legal Routes

- /legal/privacy

- /legal/terms

- /legal/disclaimer

- /legal/cookies

- /legal/affiliate

- /legal/community

- /legal/index

User Flow Integration

- Reader Experience: Show Terms + Disclaimer before using AI readers

- Journal Tools: Show Privacy + Community Guidelines

- Shop: Show Affiliate Disclosure

- Onboarding: Consent to Terms, Privacy, Disclaimer

Consent Tracking

- Stored in Supabase under user profile metadata or `legal_consents` table
